Notice identifier: 2025/S 000-010535

Procurement identifier (OCID): ocds-h6vhtk-04f6ff ([view related notices](#))

Published 20 March 2025, 6:24pm

Scope

Description

1. Overview of Requirement 1.1 Background Invasive non-native species (INNS) are one of the top threats to global biodiversity, cost the British economy around £2 billion a year, and can harm human health and interfere with our way of life. While terrestrial invasive non-native species are a serious issue, aquatic non-native species are particularly invasive and, once established, can be impossible to eradicate and extremely costly to manage. A 2016 report estimated the cost of INNS to the UK water industry as at least £7.5 million per annum, a figure expected to rise as increasing numbers of invasive species arrive in the country. This report provided a series of recommended measures for water companies to reduce the impacts of INNS, covering prevention, management, control and eradication. Following this report, the water industry has implemented measures to limit future costs, maintain services, and help protect the environment

Total value (estimated)

- £0 excluding VAT
- £0 including VAT

Below the relevant threshold

Contract dates (estimated)

- 12 May 2025 to 12 May 2026
- 1 year, 1 day

Main procurement category

Services

Additional procurement category

Works
