UoS/DH/24/25/QTR3/Toad Licence renewal

Description

Our setup of Banner is installed on top of an Oracle database system. We routinely need to complete work directly in the database and Toad is the application used. Salford uses it to run queries on the database, update data, manage user sessions, deploy database changes and other tasks without the need for access to the database server directly.

It is used by colleagues in DIT (DBAs, Developers, Testers, Architects, Support) and also in the business (Student Admin) who are experienced in its usage, having been the tool of choice for over 20 years at the University.

We track license usage to ensure we have the right number.

We have 40x licences which are due for renewal on 31/03/25.
