Single supplier - intellectual property or exclusive rights

The ibml 8300 FUSiON Scanner is an industry-standard document scanner that meets the mandatory FADGI 3-Star compliance for government records, ensuring adherence to national and regulatory standards for digital preservation.

This model is a like-for-like replacement for the current equipment used within Cardiff and Vale University Health Board, which is approaching end of life. Procuring the same model ensures a seamless transition with no disruption to existing workflows.

No additional training costs will be incurred, as staff are already familiar with the ibml scanning system.

Kodak Alaris Limited is the exclusive UK distributor of the ibml 8300 FUSiON Scanner, supplying it directly from the manufacturer. No alternative suppliers exist within the UK market for this specific model.
