The NHS Health Check programme aims to improve the health and wellbeing of adults aged 40-74 years through the promotion of early awareness, assessment, and management of the major risk factors for cardiovascular disease – risk factors that are associated with premature death, disability and health inequalities of residents in Cornwall and Isles of Scilly.

The objectives of the programme are:

- 1 To promote and improve the early identification and management of the Service Users' behavioural and physiological risk factors for vascular disease and the other conditions associated with those risk factors
- 2 To support Service Users to effectively manage and reduce behavioural risks and associated conditions through information, behavioural and evidence based clinical interventions
- 3 To help reduce inequalities in the distribution and burden of behavioural risks, related conditions and multiple morbidities.

Cornwall Council is utilising the light touch regime to produce an Approved Provider List for a five year period for all GP's registered in Cornwall and the Isles of Scilly to provide this service via a pathway to all eligible residents:

The service pathway is made up of four key components below:

- Invitation and Offer
- Risk Assessment
- Communication of Risk
