## **Section II: Object**

### **II.1) Scope of the procurement**

#### **II.1.1) Title**

Specialist Peatland Restoration

Reference number

FLS-0013-C

#### **II.1.2) Main CPV code**

- 77200000 - Forestry services

#### **II.1.3) Type of contract**

Services

#### **II.1.4) Short description**

Forestry and Land Scotland (FLS) looks after the national forests and land to enhance biodiversity, support tourism and increase access to the green spaces that will help improve Scotland's physical and mental health and well-being. FLS also continues to provide vital timber supplies to support a sustainable rural economy. Further information on who FLS are and what it does can be found here

<https://forestryandland.gov.scot/>

There are extensive areas of deep peat on Scotland's Forests & Land, including many which are afforested. FLS has committed to manage all peatlands on Scotland's forests

and land in a sustainable manner, maximising the delivery of ecosystem services for the benefit of Scotland's people and environment.

The aim of this contract is to provide specialist peatland restoration services to deliver our programme of restoration of degraded peatlands in line with targets agreed with Scottish Government as part of the wider Peatland Action delivery programme. These services are split into two distinct types of operation. Part A: Lots 1-11 Site Rewetting, and Part B: Lots 12-14 Specialised Peatland Harvesting

By 2027 onwards we expect to be restoring at least 3,000 hectares annually, thereby reducing carbon emissions, capturing additional carbon and restoring valuable priority habitats that support priority species in the process. Alongside this is our duty to help deliver Scottish Government's policy in relation to the Climate Emergency, and to do our part in delivering ecosystem services spanning environmental, social, and economical benefits.

The contract term is a maximum of five (5) years (three (3) initial years plus one optional extension of 24 months).
