Justification for not using lots

NEPO considered the use of lots as part of its options appraisal but concluded that this was not appropriate. Travel Management Services require an integrated, end-to-end solution, including booking, account management, reporting and traveller support. Disaggregation of services would increase contractual and operational complexity, dilute accountability and introduce service and continuity risks. A single-lot framework enables efficient contract management, consistent service delivery and value for money.

Further information about fees

NEPO operates a contract rebate arrangement whereby Suppliers are asked to repay NEPO a set percentage of each invoice in respect of orders placed by NEPO or any Contracting Authority accessing the Framework. The maximum rebate taken by NEPO against the value of awarded contracts will not exceed 1.0%.

Justification for framework term over 4 years

In accordance with Section 47(2) of the Procurement Act, NEPO considers that the nature of the services to be delivered under this Framework may require a longer duration than 48 months. The introduction of Emergency Accommodation services, in response to escalating pressures on Councils statutory obligations and duty of care for vulnerable individuals, requires greater collaboration and strategic partnership to develop an effective, value focused provision with the appointed supplier.

Framework operation description

The successful supplier will enter into a framework agreement (NEPO507 - Travel Management Services) with NEPO. The Framework will be accessible to NEPO Member Authorities and Associate Members through call-off contracts entered into in accordance with the framework agreement. NEPO will establish the overarching contractual terms and conditions governing use of the Framework.

Pricing will be determined through the tender process and evaluated in accordance with the published award criteria and associated weightings set out in the Invitation to Tender.

The pricing schedule is structured by service category and booking channel, with separate pricing for online and offline transactions to reflect differing service requirements.

Pricing submitted by the successful supplier will be fixed for the duration of the framework term. Tendered rates will apply nationally to all Framework users, ensuring consistency, transparency, and cost certainty across Contracting Authorities.

The Framework is a sole - supplier arrangement and will be accessed exclusively via Direct Award. Call-off contracts may be awarded at any point during the Framework term, with Contracting Authorities accessing the services on the pre-agreed terms, conditions, and pricing established through the Tender process.

Award method when using the framework

Without competition

Contracting authorities that may use the framework
