Scope

Description

We are developing our plan for how we will manage water resources in the North West from 2030-2090. With regional growth, population change, and the impacts of climate change, our Water Resources Management Plan (WRMP29) will set out how we meet the demand that these challenges create, ensuring that we continue to provide a reliable, sustainable, and good quality water supply to meet the needs of our customers and the environment.

We are working in partnership with Water Resources West (WRW), the regional planning group for the West of England and part of Wales, to ensure a consistent approach across the region.

Engagement

Engagement deadline

31 March 2026

Engagement process description

As part of the process, we are keen to hear your ideas that will tackle some of our most pressing challenges and help reduce demand on our region's water resources and or help to increase water supply. Whatever your background, we are inviting interested parties - stakeholders, suppliers, and innovators - to submit your ideas and technologies to help shape the future of water in the North West. Your input will directly influence the choices we make to ensure a reliable water supply for future generations.

We want to explore opportunities such as but not limited to:

- Demand reduction technology and options
- New bulk supply contracts
- Shared asset ownership
- Sharing or trading water

Proposed ideas must deliver a water saving or water supply equal to or greater than 0.5Ml/d.

Share your ideas with us before 31 March 2026
