Transformation

II.1.2) Main CPV code

- 72000000 - IT services: consulting, software development, Internet and support

II.1.3) Type of contract

Services

II.1.4) Short description

We are notifying suppliers of Digital Strategy and Implementation Services of an engagement opportunity to help us set up and drive the Digital Agile DevSecOps transformation office within National Grid Electricity System Operator (ESO) - Digital, Data and Technology.

We are looking for a strategic partner who can support our ambition to become an agile digital organisation. The scope of the engagement will encompass all aspects of organisational transformation workstreams; broadly categorized into People, Process, and Tools.

Broadly, the partner(s) will help us identify the transformation workstreams, intervention areas, and implementation plan; continuously adjust the plan as per feedback & learning, and execute the plan to drive the shift towards Agile.

At a high level, the strategic partners will be assessed on the depth of their experience and competency in these types of engagements and their ability to work in a multi-supplier team. The chosen supplier(s) will enter into an outcome/KPI-driven contract agreement. Whilst we will not specify the resources, we reserve the right to request a mix of resources during the course of the engagement. During the planning and execution phases, the partner(s) will collaborate with existing partners in the ecosystem.

We reserve the right to select multiple partners (3 maximum) and the scope assigned. We are reaching out to experienced partners outside of the ADAM and GMC frameworks, as this engagement does not focus on application development (AD), application maintenance (AM), or business management consultation (GMC). Resources will be required to work out of National Grid's UK offices.

The estimated value for this engagement is 3-5 million GBP spread across multiple years and potentially multiple suppliers.

Section VI. Complementary information

VI.6) Original notice reference

Notice number: [2023/S 000-004221](#)

Section VII. Changes

VII.1) Information to be changed or added

VII.2) Other additional information

It is with regret that this event is being discontinued at this stage due to other 'High Priority events taking place' in National Grid as we reserved the right to in published documentations around this event we would also like to take to opportunity to 'fine tune' the released documents and timelines given the valuable feedback given from our shortlisted participants. NGESO is very grateful for the time, effort and collaboration of our shortlisted participants and apologise for the inconvenience this has caused. A Further PIN notice will be issued today.
