Service Description

The objective is to identify AP interventions at the earliest opportunity and to work with the Provider to provide home and/or community based AP Interventions; identification is clinically determined individually in consultation with Service Users and their Families or Carers.

This service aims to: prevent admission; reduce the length of stay; facilitate wrap around care / step-down care following discharge; by providing community-based AP Interventions to Service Users identified as "highly likely" to need admission, in collaboration with external organisations. It can also be used to bridge the gap whilst Service Users are waiting for another service to become available – for example social care interventions. It is agreed that AP Interventions will be brief, and time limited to six weeks of support.

The Services to be provided by the Provider are delivery of AP Interventions which meet the needs of Service Users to prevent an admission to an acute mental health hospital or reduce the length of stay following an admission to an acute mental health hospital (the "Services") or to support discharge back into the community.

The Provider shall work in partnership with three Trust service lines:
