Description

JET Decommissioning and Repurposing Waste Data System. 3.1. The United Kingdom Atomic Energy Authority (UKAEA) are seeking a new Inventory System to track radioactive materials generated from site activities, especially in reference to radioactive materials produced from the decommissioning of the JET tokamak system. The expected complexity and amount of material arising from this decommissioning, as well as longevity concerns, have prompted aspirations to move away from the current Microsoft Access based waste inventory system. Hence a replacement system is required which provides increased capability and greater security in application support. The Preliminary Market engagement is seeking general information around experience, the platform, hosting, maintenance, pricing models and indicative costs.

Total value (estimated)

- £0 excluding VAT
- £0 including VAT

Above the relevant threshold

Contract dates (estimated)

- 28 July 2025 to 31 July 2029
- Possible extension to 29 July 2031
- 6 years, 2 days
