I.5) Main activity

General public services

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Vehicle and Components Testing Framework

Reference number

K280021593

II.1.2) Main CPV code

- 71356000 - Technical services

II.1.3) Type of contract

Services

II.1.4) Short description

DVSA requires vehicle testing and emissions investigations, to check that in-service vehicles comply with the relevant guidelines, regulations and emissions standards for their respective categories. For emissions, attention will be paid to the range of pollutants and any disparities observed under the different test conditions.

In addition to vehicles, many vehicle components will require testing as well, for example catalytic converters, tyres, glass, and lamps. These are often tested on special rigs, in specialist laboratories. The technical specification in Annex 1 lists the main automotive type approval requirements that are likely to require testing, inspection and analysis. In addition to the type approval testing and analysis requirements, DVSA may require services to provide testing or analysis on vehicle safety standards.

II.1.6) Information about lots

This contract is divided into lots: No

II.1.7) Total value of the procurement (excluding VAT)

Value excluding VAT: £5,400,000

II.2) Description

II.2.3) Place of performance

NUTS codes

- UK - United Kingdom

II.2.4) Description of the procurement

This was an open procurement to establish a framework agreement.

This framework has been set up by DVSA to meet supply testing services. DVSA requires vehicle testing and emissions investigations, to check that in-service vehicles comply with the relevant guidelines, regulations and emissions standards for their respective categories. For emissions, attention will be paid to the range of pollutants and any disparities observed under the different test conditions.

In addition to vehicles, many vehicle components will require testing as well, for example catalytic converters, tyres, glass, and lamps. These are often tested on special rigs, in specialist laboratories. The technical specification lists the main automotive type approval requirements that are likely to require testing, inspection and analysis. In addition to the type approval testing and analysis requirements, DVSA may require services to provide testing or analysis on vehicle safety standards.

II.2.5) Award criteria

Price

II.2.11) Information about options

Options: Yes

Description of options

There is a 12 month extension option for this framework agreement

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No
