An urgent award is required to enable timely assessment to those deemed to require this and to maintain continuity of care for the patients currently in titration or under shared care.

There is a high clinical risk to patients who require ongoing medication reviews and assessments in the event of any disruption in treatment.

Patients can only be initiated on ADHD medication by a specialist provider and can only be prescribed ADHD medication in primary care under shared care arrangements with a specialist provider. This is because the medications are classed as AMBER drugs under the GMMMG Formulary. Patients on these drugs are required to have routine medication reviews by the specialist service to maintain safe prescribing.
