Section II: Object

II.1) Scope of the procurement

II.1.1) Title

National Policing Proactive Investigation Recording and Management (NP2IRM)

Reference number

PDSCN-165-2022

II.1.2) Main CPV code

- 72000000 - IT services: consulting, software development, Internet and support

II.1.3) Type of contract

Services

II.1.4) Short description

This procurement is for a single supplier Framework Agreement (up to 6 years) providing a single, interoperable ICT solution for organisations within proactive investigations/operations. Capabilities will include, but not limited to, three main groupings:

- End-to-end case management. Supporting information management from initiation to resolution & disclosure.
- Decision logging. Robust & efficient logging of information feeds, significant events & decisions while reducing duplication.
- Decision support. Providing decision makers with up-to-date situational awareness across all levels of command, appropriate to the type & volatility of a proactive operation or investigation, to enable enhanced, high-tempo, data-driven decision-making with reduced cognitive burden.

Confirmation of requirements & options for this framework will be determined after pre-market engagement. The consultation is expected to inform PDS on supplier interest/capability in relation to delivery of NP2IRM.

Description of the procurement

Instead of

Text

The Police Digital Service intends to implement a Framework Agreement which allows police forces and other law enforcement agencies and public bodies to call off the services. The full scope of the services will be provided as part of the tender process but is subject to all interested Economic Operators (EO) signing a mandatory Non-Disclosure Agreement (NDA) and confirmation of appropriate vetting. It is envisaged the services, which could be let as lots (the exact nature of lots to be agreed following a market sounding exercise), may include, but not limited to, the following:

(i) Business application development – development of new applications, integration with existing systems and interfaces with external systems;

(ii) Business application/s support and maintenance – (support and maintenance of production application systems, business continuity management, upgrades to applications resulting from technology changes);

(iii) Desktop services - (end to end desktop managed service, virtual desktop infrastructure,

virtual and thin solutions, remote access, integration and interface management between third party desktop provided services and other services provided under this PIN);

(iv) System integration (service management, service desk/helpdesk, event management, incident management, problem management, request fulfilment, common service operations, access management, application support management, ICT facilities management, change management, configuration management, knowledge management, release planning, release management, service catalogue management, service level

management, capacity management, availability management, service continuity, information security management, supplier management, network management);

(v) Data Centre services - (data centre provision and management, physical hosting of servers and communication equipment, hosting of business applications, data hosting and hosting of web-based systems, backup and disaster recovery); and

(vi) Provision of Hardware and Commercial Off the Shelf (COTS) Software – (licensing of proprietary or open source software including underlying database systems, maintenance, provision of third party items, configuration and implementation services). Scope of project across UK policing. These capabilities and services are envisioned to be introduced, in one coherent solution, across proactive police operations i.e. planned, deliberate investigations/operations which may include, but not limited to:

- Serious Organised Crime (SOC) investigations and associated operations at all levels (force, regional and national) including the sensitive intelligence network;
- Counter Terrorism Policing investigations and associated operations at all levels (force, regional and national);
- Fugitive/manhunt investigations and associated operations at all levels (force, regional and national);
- Kidnap/crime in action response investigations and associated operations at all levels (force, regional and national);
- Cybercrime policing for ROCUs and forces; and
- Any planned operation where there is a clear or implied threat to life (TTL) in which the operation invokes a response under Article 2 of the Human Rights Act 1998, placing an obligation on law enforcement agencies to take reasonable steps to protect a person whose life is in 'Real and Immediate Danger'.

The Police Digital Service intends to implement a Framework Agreement which allows police forces, other law enforcement agencies and public bodies to call off the services.

The full scope of the services will be provided with the Selection Questionnaire (SQ) subject to signature of an NDA and confirmation of appropriate vetting. The high-level requirements may include, but are not limited to, the following (these will be fully defined and shared in the tender pack when it is published including the full evaluation criteria):

- (i) Business application development – (development of new applications, integration with existing systems and interfaces with external systems);
- (ii) Business application/s support and maintenance – (support and maintenance of production application systems, business continuity management, upgrades to applications resulting from technology changes);

(iii) Desktop services - (end to end desktop managed service, virtual desktop infrastructure, virtual and thin solutions, remote access, integration and interface management between third party desktop provided services and other services provided under this PIN);

(iv) System integration (service management, service desk/helpdesk, event management, incident management, problem management, request fulfilment, common service operations, access management, application support management, ICT facilities management, change management, configuration management, knowledge management, release planning, release management, service catalogue management, service level management, capacity management, availability management, service continuity, information security management, supplier management and network management);

(v) Data Centre services - (data centre provision and management, physical hosting of servers and communication equipment, hosting of business applications, data hosting and hosting of web-based systems, backup and disaster recovery); and

(vi) Provision of Hardware and Commercial Off the Shelf (COTS) Software – (licensing of proprietary or open-source software including underlying database systems, maintenance, provision of third-party items, configuration and implementation services).

Scope of project across UK policing, wider law enforcements and its partners.

These capabilities and services are envisioned to be introduced, in one coherent solution, across proactive police operations i.e. planned, deliberate investigations/operations which may include, but not limited to the following:

- Serious Organised Crime (SOC) investigations and associated operations at all levels (force, regional and national) including the sensitive intelligence network;
- Counter Terrorism Policing investigations and associated operations at all levels (force, regional and national);
- Fugitive/manhunt investigations and associated operations at all levels (force, regional and national);
- Kidnap/crime in action response investigations and associated operations at all levels (force, regional and national);
- Cyber incidents and investigations/operations across the ROCU Cybercrime Units and Force Cybercrime Units in UK policing; and
- Any planned operation where there is a clear or implied threat to life (TTL) in which the

operation invokes a response under Article 2 of the Human Rights Act 1998, placing an obligation on law enforcement agencies to take reasonable steps to protect a person whose life is in 'Real and Immediate Danger'.

In addition to the previous information, services may be required on a national scale across several sites. EOs should be capable of implementation across multiple sites simultaneously. The procurement is in support of a project vision of "A consistent, robust and trusted approach to complete case management, contemporaneous recording of decision-making and operational responses for all UK police forces and nationally coordinated law enforcement structures that are charged with conducting operations where the threat to public and officer safety may be high. This initiative will focus on the end user of intelligence and wider situational awareness that supports effective decision-making."

This procurement will also support the wider Police Digital Strategy and enabler of "aligning around a national vision for police data and technology. This will be borne from the architectural principles we apply, and will guide our investments." EOs interested in this opportunity are invited to a briefing session to be held on Friday 20th May 2022, however attendance is subject to the following criteria:

Attendee Numbers – Maximum of Two (2) persons only per EO.

Vetting – All attendees to have either current NPPV3 or SC clearance, evidence of which must be provided by Monday 9th May 2022 the latest.

NDA – Upon receipt of confirmed vetting clearance, all attendees will be forwarded an NDA which must be signed and returned by no later than Thursday 12th May 2022.

Attendance – Upon return of a signed NDA, venue details etc. will be forwarded to attendees. Please note that substitute attendees, without the required vetting clearance and a signed NDA, will be refused access to the briefing session.

Confirmation – ALL communication regarding this opportunity, attendance at the briefing session, the NDA and security vetting MUST be sent to Angie James at commercial@pds.police.uk

NB: NO OTHER FORM OF COMMUNICATION WILL BE ACCEPTED FOR THIS STAGE OF THE OPPORTUNITY.
