## **Section II: Object**

### **II.1) Scope of the procurement**

#### **II.1.1) Title**

Cranbrook-Monkerton District Heating Interconnector - Pipeline Design/Construction and/or Operation and Maintenance

Reference number

DN617266

#### **II.1.2) Main CPV code**

- 45000000 - Construction work

#### **II.1.3) Type of contract**

Works

#### **II.1.4) Short description**

Construction and fit-out of a Heat Transfer Station (circa 23MW capacity) on an EfW site

comprising District Heating pumps, construction of a 7.5 km heat transmission main and

supply and installation of 2 no heat transfer interfaces in East Devon.

The project is to connect the existing and yet to be developed parts of the

Cranbrook/Skypark and Monkerton heat networks to a low carbon heat source at Hill Barton

Business Park. When completed the project will provide low carbon heat to some 12,000

homes from an Energy from Waste plant which is currently under development. The

Cranbrook/Skypark and Monkerton networks are designed to supply 3,500 homes and 1.4m

sq ft of commercial space and 4,600 homes and 800k sq ft of commercial space

respectively. The connection project will enable the bulk supply of heat to both networks.

The interconnector will also support the planned expansion of the Cranbrook new town to circa 8,000 homes through enabling the delivery of a Future Homes Standard and Future Buildings Standard compliant energy solution.

The contract will be split into two Lots:

- Lot 1 - Design and Build/Construction Package
- Lot 2 - Operation and Maintenance

Bidders will be able to bid for one or more Lots but are not obliged in any way to bid for both.
