VII.2) Information about modifications

VII.2.1) Description of the modifications

Nature and extent of the modifications (with indication of possible earlier changes to the contract):

Extension of the existing contact services by a period of 42 months from 21st September 2025 to 31st March 2029.

Circumstances which a diligent contracting authority could not have foreseen –

Developing the documentation for the procurement of a long-term waste management contract to replace the existing contract to go to market in 2024 would be very challenging and will pose a significant risk of contractors either being reluctant to bid, or bids being inflated due to the need to price for risk associated with the uncertainty of impending significant legislative and policy initiatives (including the Deposit Return Scheme and Extended Producer Responsibility, recently published Incineration Review which suggests there could be a future need for pre-treatment of waste prior to incineration and the biodegradable waste landfill ban in 2025). It is anticipated the aforementioned will have a significant impact on Council's recycling waste composition/volume) collected & sent for processing together with as yet unknown effects on particular waste streams such as bulky waste, with concomitant effects on residual waste composition and volume. Following the implementation of any new requirements (e.g. collection service changes, changes to material composition, etc) it will generally take at least 12-24 months to be able to gain a good understanding of the impacts on the waste streams. It is estimated that the re-procurement of a contract to replace the existing waste management contract will take around 2-2.5 years to complete, from initial scoping through to contract award.

The Initial contract included provision of an Energy from waste facility subject to obtaining

necessary planning permission. This was not achieved, so the parties could agree the best suitable alternative solution. The Contract was modified in 2015, as per VEAT in 2015 which included for the design, build & operation of a MRF and the management of residual waste at an on-site RDF Facility for export or by bulk-hauling (with no on-site preparation) for UK processing. A Council waste depot and office facility were also built.

The Contract was also varied in 2013 to include the construction of a new Household waste recycling centre at Hazlehead, Aberdeen.

VII.2.2) Reasons for modification

Need for modification brought about by circumstances which a diligent contracting authority/entity could not foresee.

Description of the circumstances which rendered the modification necessary and explanation of the unforeseen nature of these circumstances:

Procurement falls outside the scope of application of the Directive Explanation:

The existing contract is being modified on the grounds of:

1. Reg 72(1)(c) PC(S)R 2015 (unforeseen circumstances); and/or
2. Reg 72(1)(e) PC(S)R 2015 (non-substantial variation)

The nature and scope of the services are unchanged compared to what is envisaged in the existing contract. The modification does not change the economic balance of the contract in favour of the contractor. The modification does not extend the scope of the contract or framework agreement considerably.

VII.2.3) Increase in price

Updated total contract value before the modifications (taking into account possible earlier contract modifications, price adaptations and average inflation)

Value excluding VAT: £415,996,113

Total contract value after the modifications

Value excluding VAT: £443,996,113
