The contract is awarded by a central purchasing body

I.3) Communication

Additional information can be obtained from the above-mentioned address

I.4) Type of the contracting authority

Body governed by public law

I.5) Main activity

Other activity

Nuclear Decommissioning

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Metallic Waste Treatment Services

II.1.2) Main CPV code

- 90520000 - Radioactive-, toxic-, medical- and hazardous waste services

II.1.3) Type of contract

Services

II.1.4) Short description

Nuclear Waste Services (NWS) is a joint trading name of both LLW Repository Limited (LLWR) and Radioactive Waste Management Limited (RWM). NWS is a division of the Nuclear Decommissioning Authority (NDA) which includes RWM and LLWR. NWS is not a legal entity but provides strategic oversight over the operation and development of these businesses through a management board governance structure. Further information on NWS can be found at

<https://www.gov.uk/government/organisations/nuclear-waste-services/about>

Nuclear Waste Services (NWS), through its Waste Services line of business, provides a Metallic Waste Treatment Service (MWTS) to both NDA and non-NDA customers. The service was established with the primary aim of prolonging the life of the repository through diverting metallic waste away from disposal at the LLWR to treatment providers with the capability of processing the metallic waste to enable it to be recycled into new products or conditioned for optimised disposal. In line with the UK Government's Solid LLW Strategy and the Waste Management Hierarchy, this provides a more sustainable solution and extends the life of the LLWR site by reducing the volume of waste requiring disposal.

II.1.5) Estimated total value

Value excluding VAT: £90,000,000

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.2) Additional CPV code(s)

- 90521400 - Transport of radioactive waste
- 90520000 - Radioactive-, toxic-, medical- and hazardous waste services
- 90521400 - Transport of radioactive waste

- 90521500 - Packaging of radioactive waste
- 14630000 - Slag, dross, ferrous waste and scrap

II.2.3) Place of performance

NUTS codes

- UK - United Kingdom

II.2.4) Description of the procurement

The procurement will deliver a contractual mechanism for the metallic waste treatment service. The current estimated maximum spend through the service is £90M, although the service will formally be a zero-value agreement, with no spend guaranteed.

The scope of the procurement is to manage the full metallic waste treatment lifecycle which could include the following:

- On-site works, de-planting activities, and waste preparation.
- Treatment of metallic waste in line with the waste management hierarchy and BAT.
- Management of Primary and Secondary Waste for onward recycling and/or disposal.
- Storage of metal pre and/or post treatment.
- Transport.
- Characterisation.
- Packaging Provision.
- Expert Support.

II.2.14) Additional information

NWS intends to hold a supplier event in September 2023 to share its high-level scope. Details will be issued via the Atamis portal to those organisations that have registered to express interest. Please access the view live opportunities page on the Atamis Portal (<https://one-nda.force.com/s/Welcome>) and search for C14052 PIN for Metallic Waste Treatment Services.

II.3) Estimated date of publication of contract notice

13 September 2023

Section IV. Procedure

IV.1) Description

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: Yes
