II.1.4) Short description

Blackpool Council is seeking a versatile web based data management system that is capable of handling asset information, not limited to highways asset information, referred to as the 'Road Asset Management System' (RAMS). The RAMS will be used to visualise the condition, location and history of a range of asset types, in context with other spatial data.

The scope of work is in two parts;

- Part 1 – Data Collection - In order to provide suitable data to allow the effective modelling a provider is required to undertake physical surveys of the highways and footways network.
- Part 2 - Deterioration and Lifecycle Modelling - In order to understand the medium to long term deterioration of the highways network, and then model the implications of any given investment/maintenance regime, the Provider shall make available online deterioration and investment modelling software as a service, using the SaaS (Software as a Service) principle.
