This requirement is for an IT Technical Services and Disposal

Acas operates its own internal IT operations, managed by the Digital, Data and Technology (DDaT) Team. This team is responsible for day to day management and maintenance of live IT assets, software, configuration, and security policies. The scope of the requirement is for the following services: Asset Storage, disposal and management, with IT Technical Support for the assets, such as asset disposal, asset redeployment or

installation (including end user device imaging, configuration, and application management). The service should also provide technical support for Infrastructure Assets such as Network devices and firewalls. The scope should be taken in the context of the core requirements described in 'Section 3 Requirements'. Acas DDaT are accountable for the assets they deliver to Acas users and will be the sole authority regarding instructions of its assets, their configuration and deployment.
