Body governed by public law

I.5) Main activity

General public services

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Redcar 66kV Cable Replacement (to allow land clearance)

Reference number

DN667632

II.1.2) Main CPV code

- 45000000 - Construction work

II.1.3) Type of contract

Works

II.1.4) Short description

Expression of interest - Description

South Tees Development Corporation (STDC) is planning to modify, replace and extend parts of the high voltage distribution infrastructure on the Teesworks Site as part of a major redevelopment of the former iron and steelmaking establishment. One aspect of these plans includes the installation of two new 66,000 Volt (66kV) feeder cables within the Redcar site to allow for land clearance of an area through which the current 66kV cables are routed. For the purpose of this document, the name Teesworks will be used as a reference for the site and its personnel.

To support this aim STDC is looking for a suitable contractor to undertake a turnkey project for the engineering design, procurement, construction, testing commissioning and management of all aspects involved for the installation of the feeder cables. This will include the required civils works in addition to the work associated with cable installation and connection. The project is of strategic importance for the arrival of a major investor to the site as part of the Net Zero Teesside (NZT) development and will involve key milestone dates which will form part of the requirements of the formal tender when issued in May 2023.

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.2) Additional CPV code(s)

- 45315400 - High voltage installation work

II.2.3) Place of performance

NUTS codes

- UKC - North East (England)

II.2.4) Description of the procurement

Description

South Tees Development Corporation (STDC) is planning to modify, replace and extend parts of the high voltage distribution infrastructure on the Teesworks Site as part of a major redevelopment of the former iron and steelmaking establishment. One aspect of these plans includes the installation of two new 66,000 Volt (66kV) feeder cables within the Redcar site to allow for land clearance of an area through which the current 66kV cables are routed. For the purpose of this document, the name Teesworks will be used as a reference for the site and its personnel.

To support this aim STDC is looking for a suitable contractor to undertake a turnkey project for the engineering design, procurement, construction, testing commissioning and management of all aspects involved for the installation of the feeder cables. This will include the required civils works in addition to the work associated with cable installation and connection. The project is of strategic importance for the arrival of a major investor to the site as part of the Net Zero Teesside (NZT) development and will involve key milestone dates which will form part of the requirements of the formal tender when issued in May 2023.

II.2.5) Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.7) Duration of the contract, framework agreement or dynamic purchasing system

Start date

26 April 2023

End date

12 May 2023

This contract is subject to renewal

No

II.2.10) Information about variants

Variants will be accepted: No

II.2.11) Information about options

Options: No

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

Section IV. Procedure
