Yes

Procedure

Procedure type

Direct award

Special regime

Utilities

Direct award justification

- Prototypes and development
- Single supplier - intellectual property or exclusive rights

- Single supplier - technical reasons

Network Rail are the main landowner and asset owner impacted by the proposed works, and they also control access to the railway due to safety and operational requirements. Network Rail also maintain the standards that any new infrastructure must adhere to.

Whilst these can be managed as interfaces, through a different procurement route, the timing constraints and particular risk associated with the asset (an old structure, of unknown condition) means that Network Rail is uniquely placed to manage these risks, and minimise interface risk or delay to the design works.
