II.2.4) Description of the procurement

The University of Edinburgh wishes to appoint a single supplier to provide comprehensive planned and reactive maintenance service for our Schneider Sigma and EcoStruxure Building Energy Management Systems (BEMS) and associated controls equipment installed throughout the University estate.

The University's brief for the Schneider Sigma and EcoStruxure BEMS maintenance contract is to provide comprehensive planned and reactive maintenance for both systems throughout the estate and to ensure the virtual servers that host the BEMS systems are kept up to date with the latest BEMS software releases. The contract will be fully comprehensive with the exception of Sigma range controllers, which are now obsolete and supplies are limited. The University will provide any Sigma spares from the stock accumulated through various Controller upgrade projects. The estate has approximately 750 buildings and covers some 800,000 square metres around central Edinburgh and outlying areas with the major locations at the Central Area, Kings Buildings, Easter Bush, Little France, Western General Hospital and Pollock Halls of Residence. There is a diverse variety of buildings and facilities ranging from standard offices and lecture theatres up to highly complex 24/7 laboratory facilities and server rooms with all of the critical control parameters and alarm reporting functions associated with these types of installations. For this reason, some of these critical installations will be deemed to require a 24/7 call out with a maximum 4-hour response time.
