Description

Sport England is a lottery distributor, administering and awarding approximately £300m per annum (£100m exchequer and £200m lottery). The funds are distributed across the sport and physical activity ecosystem, a complex network of over 100,000 organisations of different sizes and types. This network of organisations provides the opportunities that already underpin the activity habits of millions of people and the athletes that progress through talent development pathways.

Having a fit for purpose technology system for investment administration is therefore essential for Sport England to deliver its strategic ambitions and role as a funding distributor.

The technology system underpins a substantive part of Sport Englands operation, and as a result needs to balance key operating tensions including:

Strategy ambitions and stakeholder expectations: The launch and continued support for Uniting the Movement signals both the sector engagement and expectations for delivery of the strategy including ease of access to funding.

Financial operating constraints: Sport England operates within administrative constraints impacted by income. Maximising efficiency and productivity in investment will enable effective delivery within the constraints.

Government functional standards and best practice: Rightly government require standards to be achieved for grant administration including counter-fraud. Sport England has established investment management - any change must not compromise standards.

Continuity of operation and delivery: As Sport England existing commitments and necessary ambitions require delivery scale and cadence to be maintained throughout any change.

Alignment with future target operating model: Finally, any improvement in technology needs to align, and have the ability to, adapt to future operating structures and priorities.

Proof of Concept Delivery: A limited time period Proof of Concept (PoC) has recently been delivered prior to this phase. This has demonstrated the approach and functionality can be successful, and the build created will be extended to form the basis of the next phase of development. The PoC contained some limited functionality for the investment management journey in the system. It is deployed on Azure using Azure App service to manage Docker containers, database is PostgreSQL, API backend is asynchronous Python / Starlette, front end is in React with backend for frontend pattern based on Remix.

This procurement is split into four (4) Lots. Requirements are outlined by Lot below:

3.1 Lot 1 - Managed Service, Technical Assurance & Development

3.2 Lot 2 - Core Developer

3.3 Lot 3 - Specialist Developers

3.4 Lot 4 - Change Management Support

Total value (estimated)

- £2,390,000 excluding VAT
- £2,868,000 including VAT

Above the relevant threshold

Contract dates (estimated)

- 13 June 2025 to 31 March 2026
- Possible extension to 31 March 2027
- 1 year, 9 months, 18 days

Description of possible extension:

a one year extension option

Lot LOT 1. Managed Service, Technology and Delivery Support

Description

Managed Technology Infrastructure: Maintain core infrastructure, manage system environments, develop non-feature-related infrastructure and compatibility with feature-related development of Lot 2.

- Technical Partner: Provide technical oversight, quality assurance, and contribute to the architecture roadmap.
- Technical Skills and Supporting Development: Provide technical expertise in Microsoft technologies, including Azure and PowerBI. Supplementary skills for project delivery such as testing, documentation, client-side delivery support. Flexible additional development capacity if required during the project.
- Managed Support Service: Provide post-go-live support, including service desk management, incident

management and performance monitoring

Lot value (estimated)

- £750,000 excluding VAT
- £900,000 including VAT

Same for all lots

CPV classifications, contract locations and contract dates are shown in the Scope section, because they are the same for all lots.

Lot LOT 2. Core Developer

Description

- Core Functional Product Build: End-to-end

development of the product functionality.

- Solution Design and Problem Solving: Interpret organisational requirements, solve complex challenges, and collaborate closely with business users and stakeholders.

- Feature-Related Technical Infrastructure: Develop system architecture, and integration with non-feature related development of Lot 1.

- Commercial Proposition: Potential to extend value of the system for future commercial proposition with similar organisations.

Lot value (estimated)

- £750,000 excluding VAT
- £900,000 including VAT

Same for all lots

CPV classifications, contract locations and contract dates are shown in the Scope section, because they are the same for all lots.

Lot LOT 3. Technical - Supporting Development and Specialist Capabilities

Description

General Development: Additional capacity to support the Managed Service supplier (Lot 1) and Core Developer supplier (Lot 2). Flexible to be called on as demand required, with smaller projects of work to be delivered during the contract period based on SE requirements and based on mutually agreed effort, timescales and

deliverables.

- Supporting Capabilities: Provide access to a specific or range of specialist skills required to support system development, such as potential for data migration projects, technical software development, business analysis, UX/UI design, and the finance system integration applicable for SEs NetSuite finance tool.

Different skills to be called on as the project evolves for flexibility to meet the requirements of the project

Lot value (estimated)

- £590,000 excluding VAT
- £708,000 including VAT

Same for all lots

CPV classifications, contract locations and contract dates are shown in the Scope section, because they are the same for all lots.

Lot LOT 4. Programme

Description

- Change Management: Provide client-side resource to

13

lead the implementation of our programme change strategy.

- Communications Support: Provide communications support to plan and execute key comms to stakeholders.

Lot value (estimated)

- £300,000 excluding VAT
- £360,000 including VAT

Same for all lots

CPV classifications, contract locations and contract dates are shown in the Scope section, because they are the same for all lots.
