Section II: Object

II.1) Scope of the procurement

II.1.1) Title

TfW - C000732.00 - Welsh Bus Data Services

Reference number

C000732.00

II.1.2) Main CPV code

• 72300000 - Data services

II.1.3) Type of contract

Services

II.1.4) Short description

TfW is looking to procure the services of Supplier(s) for Welsh Bus Data Services which is split into the following Lots:

- Lot 1 Welsh Bus Data Service - Receive, store, process and share operational and financial data about buses in Wales.

- Lot 2 Welsh Bus Display Board Content Management System - Manages public service messages, real time information and other content for transmission to display boards.

II.1.6) Information about lots

This contract is divided into lots: Yes

II.1.7) Total value of the procurement (excluding VAT)

Value excluding VAT: £5,000,000

II.2) Description

II.2.1) Title

Welsh Bus Data Service (WBDS)

Lot No

1

II.2.2) Additional CPV code(s)

- 48000000 - Software package and information systems
- 48800000 - Information systems and servers
- 48810000 - Information systems
- 48625000 - Open systems operating systems
- 48627000 - Real-time operating system software package
- 48813000 - Passenger information system
- 72000000 - IT services: consulting, software development, Internet and support
- 72100000 - Hardware consultancy services
- 72200000 - Software programming and consultancy services
- 72210000 - Programming services of packaged software products
- 72212000 - Programming services of application software
- 72212670 - Real time operating system software development services
- 72300000 - Data services
- 72310000 - Data-processing services
- 72320000 - Database services
- 72330000 - Content or data standardization and classification services

II.2.3) Place of performance

NUTS codes

- UKL - Wales

Main site or place of performance

Wales and Borders

II.2.4) Description of the procurement

The aim of the Welsh Bus Data Service (WBDS) is to improve the quality and availability of information about buses in Wales for passengers, public sector decision makers, third party data services, researchers and other data consumers.

The successful supplier will offer innovative and cost-effective solutions to improve and maintain data quality and will be capable of extending the service to support other transport modes and active travel if required.

Examples of the benefits of this service will be access to real time prediction of bus arrival times for all bus stops in Wales and demonstrably secure systems and processes for handling confidential data used to support the planning of bus services.

Lot 1 Welsh Bus Data Service will provide a system and service to receive, store, process and share operational and financial data about buses in Wales. This means TfW can use the information to inform delivery of bus projects and can provide data to third party apps for journey planning, to local authorities for contract management, to services such as the BES payment and reconciliation portal and to Welsh Government to help to inform policy making.

This service will replace and upgrade the systems that Traveline use for bus data collection and management so that all parties can be assured of the quality of the data that is being provided.

Lot 1 also has 5 additional option packages that Tenderers are required to bid and price against:

- Option 1 – Managed Service

- Option 2 – Analytics Package

- Option 3 – Managing Data for Other Modes

- Option 4 - Bus Operations Room

- Option 5 - Integration with TfW API Gateway

Further details and specific requirements can be found in Volume 5 of this ITT. TfW will evaluate these priced options as described in Volume 7 of this ITT but may or may not purchase them at the time of Award of Contract.

II.2.5) Award criteria

Quality criterion - Name: Quality / Weighting: 60

Price - Weighting: 40

II.2.11) Information about options

Options: Yes

Description of options

Lot 1 also has 5 additional option packages that Tenderers are required to bid and price against:

- Option 1 – Managed Service

- Option 2 – Analytics Package

- Option 3 – Managing Data for Other Modes

- Option 4 - Bus Operations Room

- Option 5 - Integration with TfW API Gateway

Further details and specific requirements can be found in Volume 5 of this ITT. TfW will evaluate these priced options as described in Volume 7 of this ITT but may or may not purchase them at the time of Award of Contract.

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

II.2.14) Additional information

- 72310000 - Data-processing services

- 72320000 - Database services

- 72330000 - Content or data standardization and classification services

II.2.3) Place of performance

NUTS codes

- UKL - Wales

Main site or place of performance

Wales and Borders

II.2.4) Description of the procurement

The Welsh Bus Display Board Content Management System (WBDCMS) will simplify the operational management of displays by implementing a standard interface with all displays which are compliant with the Real Time Integration Group's CMS to Display interface specification.

An example of the benefits of this service will be giving local authorities the flexibility to procure the right display for the right location, confident that they will be able to issue public service messages across all the displays without having to procure and manage separate, proprietary content management systems from each display provider.

Lot 2 Welsh Bus Display Board Content Management System - will provide a means to send public service messages, real time information and other content to new displays procured from the associated framework and to existing displays where they can be upgraded to interface with the CMS.

This service will interface with the Welsh Bus Data Service and will negate the need for individual local authorities to procure separate real time information engines and content management systems for their localities.

II.2.5) Award criteria

Quality criterion - Name: Quality / Weighting: 60

Price - Weighting: 40

II.2.11) Information about options

Options: No
