II.2.4) Description of the procurement

The NHS Long Term Plan published on 7th January 2019 included a new ambition to

diagnose three out of four people with cancer at an early stage by 2028. To help deliver on this ambition, the Plan also committed to the extension of Targeted Lung Health Check across England. The programme builds on approaches trialled successfully in Manchester and Liverpool, where 55- to 74-year-olds who currently or had ever smoked were invited for a lung health check, with those identified at high of lung cancer receiving a CT scan to identify possible lung cancers.

St Helens and South Sefton CCGs have now been offered funding to participate in the Programme and have been prioritised based on mortality outcomes from lung cancer. There is an expectation that the first CT scans will be delivered in August 2022.

The potential contract will be valued at approximately £2,299,348* per year; and the contract duration will be for 4 years with the potential to extend for a further 1 x 1-year period. The extension will be subject to further funding being made available to the CCGs.

* Annual contract value is an average across the 5 years and is expected to be lower in the earlier years.
