#### **II.1.2) Main CPV code**

- 48000000 - Software package and information systems

#### **II.1.3) Type of contract**

Supplies

#### **II.1.4) Short description**

Nottingham City Council (NCC) and Derby City Council (DCC) (each Council) have been working together to define their requirements for a joint Mobility as a Service (MaaS) platform that would meet the requirements of each Council, and their respective stakeholders and Customers.

The Councils are seeking to procure a white-label MaaS platform offering functionality across multi-modal journey planning, booking and reservations and payment services. The overall aim is to deliver a MaaS platform which provides the user with a simple to use interface, offering the most up to date passenger travel information and real-time and predictive information seamlessly to the user.

A total budget of £2.6 million is being made available to support in the delivery. There is an expectation that MaaS providers will deliver a turn-key solution to each Council. To clarify, 'turn-key' means a platform built, supplied, installed, ready to operate, maintained and promoted by the provider.

Each Council is looking for a partner who will:

- ? Work in partnership to deliver the very best platform available;
- ? Work collaboratively and efficiently through issues, and understand that requirements might vary in line with changing or evolving technologies;
- ? Work collaboratively to find the best solutions for customers, and stakeholders;
- ? Provide call centre support for customers; and
- ? Have the customers' needs at the heart of driving forward innovation.

This contract is being funded through a time limited grant, as a result there is an immovable milestone that must b

#### **II.1.6) Information about lots**

This contract is divided into lots: No

### **II.2) Description**

#### **II.2.3) Place of performance**

NUTS codes

- UKF - East Midlands (England)

#### **II.2.4) Description of the procurement**

Nottingham City Council (NCC) and Derby City Council (DCC) (each Council) have been working together to define their requirements for a joint Mobility as a Service (MaaS) platform that would meet the requirements of each Council, and their respective stakeholders and Customers.

The Councils are seeking to procure a white-label MaaS platform offering functionality across multi-modal journey planning, booking and reservations and payment services. The overall aim is to deliver a MaaS platform which provides the user with a simple to use interface, offering the most up to date passenger travel information and real-time and predictive information seamlessly to the user.

A total budget of £2.6 million is being made available to support in the delivery. There is an expectation that MaaS providers will deliver a turn-key solution to each Council. To clarify, 'turn-key' means a platform built, supplied, installed, ready to operate, maintained and promoted by the provider.

Each Council is looking for a partner who will:

- ? Work in partnership to deliver the very best platform available;
- ? Work collaboratively and efficiently through issues, and understand that requirements might vary in line with changing or evolving technologies;
- ? Work collaboratively to find the best solutions for customers, and stakeholders;
