II.1.4) Short description

The University of Southampton is seeking suitably qualified construction project and cost management consultancy services to support the redevelopment of the North East Quadrant (NEQ) of the University's Highfield Campus. The redevelopment project is being considered to provide a new visual gateway and functional focus to the University, to refocus a space currently used predominantly for car parking into productive academic use and to help as an attractor to students and staff from both the UK and internationally.

The requirement for project and cost management construction consultancy services will include, but not be limited to, the following:

Project Management Consultancy Services

- ? The coordination and management of the project and programming and agreeing timescales and activities of the Project Team;
- ? Act as coordinating Lead Consultant and Contract Administrator under the building contract;
- ? Establish and manage systems and procedures to meet all project objectives;
- ? Manage key project processes;

- ? At each work stage take the lead responsibility for project programming, construction and logistics planning as necessary
- ? Provide resources such as building surveyor, clerk of works and approved inspector services as necessary

Cost Management Consultancy Services

- ? The provision of cost management services;
- ? Cost planning (including building engineering services and mechanical handling and process equipment);
- ? Whole life cost and cost in use analysis.

II.2.4) Description of the procurement

The University of Southampton is seeking suitably qualified project management construction consultancy services to support the redevelopment of the North East Quadrant (NEQ) of the University's Highfield Campus.

Much of the main Highfield Campus was built in the 1960s during the post-war expansion of higher education and was appropriately scaled for 3,000 students. Student numbers today exceed 23,000 which puts considerable pressure on aging facilities some of which are inadequate, inflexible and inefficient by today's standards, as well as expensive to run.

A project on the North East Quadrant of the Highfield Campus is therefore being considered as a development to provide a new visual gateway and functional focus to the University, to refocus a space used predominantly for car parking into productive academic use and help act as an attractor to students and staff from both the UK and internationally.

The project has considerable potential to enhance the student, staff and visitor experience and will encompass rethinking of the North East part of campus pedestrian and vehicular routes and flows, servicing strategies, enhancement of the public realm, and add functions commensurate with the expectations of a leading Russell Group university.

The full Project Management scope of services are detailed in File 4 but will include, but is not limited to, the following:

- The coordination and management of the project and programming and agreeing timescales and activities of the Project Team;
 - Act as coordinating Lead Consultant and contract administrator under the building

contract;

- Establish and manage systems and procedures to meet all project objectives;
- Manage key project processes;

At each work stage take the lead responsibility for project programming, construction and logistics planning as necessary

- Provide resources such as building surveyor, clerk of works and Approved Inspector services as necessary

- 3. When justified, the University reserves the right to exclude from a procurement, any Potential Supplier whose current financial capacity would pose an unacceptable risk to the University and/or public money. Insurance The stated levels of insurance are a mandatory requirement of this procurement and the University reserves the right to exclude a Potential Supplier who does not hold or is not willing to hold the minimum levels of insurance. If you already hold the required levels of insurance the University may require copies of the insurance documents as evidence of this, please ensure they are available if requested. Where you do not currently hold the required levels of insurance, it is important you check with your insurance company that your organisation and every organisation that is being relied on to meet this procurement, is able to obtain the levels of insurance required. Written evidence from your insurance company that it will provide insurance(s) to the required levels may be required upon request. Minimum level(s) of standards possibly required: The minimum level of Turnover for this project has been set at £2 million per annum for each lot. The University has risk assessed the insurance requirements for this procurement and has deemed that the following minimum levels of insurance will be required: - Public Liability - £10 million - Employers' (Compulsory) Liability - £10 million - Professional Indemnity - £10 million

Minimum level(s) of standards possibly required

Due to the ongoing effects of the COVID 19 pandemic, proof of turnover can be provided in the form of accounts ending financial year 2019/2020. This will enable the University of Southampton to get an accurate reflection of a standard business year for any bidding service providers.
