Proc2818

Description

We are responding to a sector-wide demand for high-quality assessment and feedback solutions that support effective, secure, and learner-centred assessment practices. We are considering the creation of a compliant procurement framework and are seeking to engage with suppliers in the proposed solution areas ("lots"), which are intended to cover the full digital assessment lifecycle.

Lot 1: Digital Assessment Platforms

End-to-end digital assessment solutions that support assessment design, delivery, marking, moderation, analytics, and feedback.

Lot 2: Originality and Academic Integrity Tools

Tools that support plagiarism detection, text similarity checking, and broader academic integrity workflows.

Lot 3: Secure Assessment Delivery

Lockdown browsers and secure testing environments that restrict device and system access during assessments.

Lot 4: Online Proctoring Solutions

Live, recorded, or AI-enabled proctoring services that support secure remote and hybrid assessment delivery.

Lot 5: Learner-Centred ePortfolio Solutions

Directly purchasable ePortfolio systems that enable learners to collect, reflect on, and present evidence of learning, with integrated assessment and feedback functionality.

Lot 6: Assessment Integrations and Add-On Tools

Specialist tools that integrate with digital assessment or examination platforms included on the framework. These may be supplied by third-party providers rather than the core platform vendor, allowing members to procure complementary solutions alongside a larger system.

Please request a copy of the Request for Information (RFI) from procurement@jisc.ac.uk for full details,

Commercial tool

Establishes a framework

Contract dates (estimated)

- 1 November 2026 to 31 October 2029
- 3 years
