Main site or place of performance

Drigg, Cumbria, England

### **II.2.4) Description of the procurement**

Nuclear Waste Services (NWS) is a joint trading name of both LLW Repository Limited (LLWR) and Radioactive Waste Management Limited (RWM). NWS is a division of the Nuclear Decommissioning Authority (NDA) which includes RWM and LLWR. NWS is not a legal entity but provides strategic oversight over the operation and development of these businesses through a management board governance structure. Further information on NWS can be found at <https://www.gov.uk/government/organisations/nuclear-waste-services/about> NWS is proceeding to re-procure the fleet maintenance contract which includes the following: • Routine maintenance of the types of equipment listed below (in line with our Computerised Maintenance Management System CMMS) • Carrying out repairs to the fleet as required (including responding to breakdowns) • Management of waste generated from breakdowns/ repairs and maintenance • Provision of spares for the transport fleet (critical spares to be held as stock on site) This contract shall be for the LLW Repository Ltd site near Drigg Village in Cumbria, England. Fleet Maintenance Contract Outline Scope

This requirement will be for a contract for a period of five years (3 years + 2 years).

The anticipated commencement date for the contract is currently 1st January 2023 and we intend to issue a Contract Notice following the Open procedure in the near future

The contractor will be required to provide a maintenance service to include the following elements:

- Routine maintenance of the types of equipment listed below.

The preventative maintenance schedule will be provided by Nuclear Waste Services and is generally based on 6 weekly, 12 weekly and 24 weekly maintenance processes. Where there is no bespoke maintenance schedule, the vehicle/equipment should be maintained

in accordance with manufacturers' guidelines.

- Unplanned Maintenance Services – corrective maintenance

Repairing a fault or problem which has been identified outside of the preventative maintenance schedule.

- Carrying out repairs to the fleet as required, including responding to breakdowns. Any breakdown repairs identified will be programmed and completed expediently to minimise down-time and impact to site operations.
- Management of waste generated from breakdowns/ repairs and Maintenance.
- Provision of spares for the transport fleet (critical spares to be held as stock on site)  
Critical or frequent use spares will be identified at the start of the contract and purchased and stocked at the Nuclear Waste Services Drigg site. The contractor will be responsible for ordering all spares on an ongoing basis. The contractor will also complete an obsolescence report on an annual basis for the entire transport fleet.

It is envisaged that there will be a requirement for the contractor to supply one technician to be based at our main site full time and they will also be required to provide the necessary equipment to enable them to carry out the maintenance activities.
