#### II.1.4) Short description

The new framework agreement objective is to procure a replacement single telematics solution for SW's fleet of approximately 1800 vehicles ranging from small to heavy vehicles. This will enable real time monitoring in the back office and driver feedback in the cab as a means of improving driving style, safety and performance. The successful supplier must have the one integrated software system capable of tracking and monitoring both ICE vehicles and EV's. The successful supplier must be capable of allowing API outputs to third party systems to support home charging of EVs. It is essential that any new system implementation happens in tandem with other measures to support drivers, including training (general and targeted) to fully realise benefits post go live. The new supplier (If relevant) must work with the incumbent supplier for a smooth transition with no break or disruption in Scottish Waters service.
