Description

Nuclear Waste Services (NWS), (the Client) through its Waste Services line of business, is procuring this Framework for waste Treatment and Conditioning Services on behalf of its Customers. A Customer is defined as organisations that either currently hold, or may in future enter into, a Waste Services Contract with NWS. This waste Treatment and Conditioning Services will support the delivery of the Integrated Waste Management Programme (IWMP) by providing the Client and its Customers access to a supply chain for treatment and conditioning of waste (primarily radioactive but may contain quantities of norm waste). This includes but is not limited to soft/solid combustible/compactable wastes through to oils, liquids, resins etc. and covering activity levels ranging from lower activity low level waste up to boundary waste and beyond including radioactively contaminated chemical and hazardous wastes. The services to be provided under this framework will cover all stages of the waste lifecycle and to this end, Contractors must have knowledge

and understanding across the full radioactive waste management lifecycle and the ability to operate and execute work and provide support and services the Client may require at each stage of the waste management lifecycle. To maintain access to established waste management routes which are now embedded in waste producer's operations, the Client requires the Contractor to be able to provide either Incineration or Supercompaction (both of which must be able to deal with radioactive wastes) as a minimum requirement in order to secure a place on the framework, these will be referred to as minimum treatment capabilities. In addition to the minimum treatment capabilities, Contractors may offer other optional treatment processes, should the Contractor wish to offer additional treatments, any such capability should be detailed within their tender bid submission along with completion of the Capability Matrix which will be issued with the ITT documentation. An anticipated maximum of 5 suppliers will be appointed to the framework. Organisations that either currently hold, or may in future enter into, a Waste Services Contract with NWS, include private sector bodies, plus public sector bodies that fall into one or more of the following categories: 1) Any of the following and their future successors: (a) ministerial government departments; (b) non-ministerial government departments; (c) executive agencies of government; (d) Non-Departmental Public Bodies (NDPBs), including advisory NDPBs, executive NDPBs, and tribunal NDPBs; (e) Assembly Sponsored Public Bodies (ASPBs); (f) police forces; (g) fire and rescue services; (h) ambulance services; (i) maritime and coastguard agency services; (j) NHS bodies; (k) educational bodies or establishments including state schools (nursery schools, primary schools, middle or high schools, secondary schools, special schools), academies, colleges, Pupil Referral Unit (PRU), further education colleges and universities; (l) hospices; (m) national parks; (n) housing associations, including registered social landlords; (o) third sector and charities; (p) citizens advice bodies; (q) Councils, including county councils, district councils, county borough councils, community councils, London borough councils, unitary councils, metropolitan councils, parish councils; (r) public corporations; (s) public financial bodies or institutions; (t) public pension funds; (u) central banks; and (v) civil service bodies, including public sector buying organisations. 2) Those listed and maintained by the Government on their website at <https://www.gov.uk/government/organisations> or any replacement or updated web-link. 3) Those listed and maintained by the Office of National Statistics (ONS) at <https://www.ons.gov.uk/economy/nationalaccounts/uksectoraccounts/datasets/publicsectorclassificationguide> or any replacement or updated web-link. 4) Those bodies in England, Wales or Northern Ireland which are within the scope of the definition of 'Contracting Authority' in Section 2 of the Procurement Act.

Establishes a framework

Total value (estimated)

- £48,900,000 excluding VAT
- £58,680,000 including VAT

Above the relevant threshold

Contract dates (estimated)

- 16 October 2026 to 15 October 2030
- 4 years

Main procurement category

Services

CPV classifications

- 90521000 - Radioactive waste treatment services
- 90521300 - Disposal of radioactive waste
- 90521500 - Packaging of radioactive waste
- 90521100 - Collection of radioactive waste
- 90521400 - Transport of radioactive waste
- 90521200 - Radioactive waste storage services

Contract locations

- UK - United Kingdom

Engagement

Engagement deadline

2 May 2025

Engagement process description

A previous market engagement event in relation to this procurement was held in person on 10/12/2024, prior to the introduction of the Procurement Act 2023 (see F01: Prior information notice reference 2024/S 000-036789). This event touched on elements including an Overview on the NWS Strategy & Waste Services Contracts, the high level Technical Scope & Lifecycle Stages, Procurement Details & Indicative Dates, Contract Management, and Social Value & Sustainability. NWS intends to hold a further virtual Supplier Engagement Event on Tuesday 6th May 2025 from 09:00 till 12:00 to share high-level scope and other details. To register interest in the opportunity and to book your place at the engagement event please contact either: -
