Tenders or requests to participate must be submitted to the above-mentioned address

I.4) Type of the contracting authority

Ministry or any other national or federal authority

I.5) Main activity

General public services

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Energy Innovation Needs Assessments 2.0

II.1.2) Main CPV code

- 71314000 - Energy and related services

II.1.3) Type of contract

Services

II.1.4) Short description

BEIS is considering a supplier to undertake a comprehensive update of the 2019 published Energy Innovation Needs Assessments (EINAs). The project will be delivered in

consultation with government technical and analytical experts and will allow BEIS to build a robust knowledge base to guide UK decisions for the support of innovation in net zero related technologies, systems and processes. Project deliverables will provide insights into the potential of technologies, systems and processes to:

- lead to a reduction in energy and/or decarbonisation costs;
- improve UK energy security;
- generate economic benefits to the UK;
- help meet UK climate change targets;

and help contextualise UK challenges and capabilities in meeting such opportunities by identifying, exploring, and quantifying key UK net zero innovation barriers and enablers.

For background information, the full specification and further information on this project please see the ITT.

II.1.5) Estimated total value

Value excluding VAT: £480,000

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.3) Place of performance

NUTS codes

- UK - United Kingdom

II.2.4) Description of the procurement

BEIS is considering a supplier to undertake a comprehensive update of the 2019 published Energy Innovation Needs Assessments (EINAs). The project will be delivered in consultation with government technical and analytical experts and will allow BEIS to build a robust knowledge base to guide UK decisions for the support of innovation in net zero related technologies, systems and processes. Project deliverables will provide insights into the potential of technologies, systems and processes to:

- lead to a reduction in energy and/or decarbonisation costs;

- improve UK energy security;
- generate economic benefits to the UK;
- help meet UK climate change targets;

and help contextualise UK challenges and capabilities in meeting such opportunities by identifying, exploring, and quantifying key UK net zero innovation barriers and enablers.

For background information, the full specification and further information on this project please see the ITT.

II.2.5) Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.7) Duration of the contract, framework agreement or dynamic purchasing system

Duration in months

15

This contract is subject to renewal

No
