## **Section II: Object**

### **II.1) Scope of the procurement**

#### **II.1.1) Title**

BCU-OJEU-56289 - Electrical Infrastructure Works at Betsi Cadwaladr University Health Board (BCUHB) Glan Clwyd Hospital Site.

Reference number

BCU-OJEU-56289

#### **II.1.2) Main CPV code**

- 45000000 - Construction work

#### **II.1.3) Type of contract**

Works

#### **II.1.4) Short description**

The Glan Clwyd Hospital site has a strategic plan for future development and reduction of carbon usage through the implementation of refurbishments, new developments, and net-zero carbon technologies. To enable the provision of the site developments and low carbon technologies, significant upgrades to the electrical power infrastructure are required, this includes additional capacity from the distribution network operator (DNO), and new private site infrastructure.

#### **II.1.5) Estimated total value**

Value excluding VAT: £700,000

#### **II.1.6) Information about lots**

This contract is divided into lots: No

### **II.2) Description**

#### **II.2.2) Additional CPV code(s)**

- 45000000 - Construction work
- 45210000 - Building construction work
- 45215000 - Construction work for buildings relating to health and social services, for crematoriums and public conveniences
- 45215100 - Construction work for buildings relating to health
- 45300000 - Building installation work
- 45310000 - Electrical installation work
- 45351000 - Mechanical engineering installation works
- 45400000 - Building completion work
- 45420000 - Joinery and carpentry installation work
- 45430000 - Floor and wall covering work
- 45440000 - Painting and glazing work
- 45450000 - Other building completion work
- 45453100 - Refurbishment work

### **II.2.3) Place of performance**

NUTS codes

- UKL13 - Conwy and Denbighshire

### **II.2.4) Description of the procurement**

The Glan Clwyd Hospital site has a strategic plan for future development and reduction of carbon usage through the implementation of refurbishments, new developments, and net-zero carbon technologies. To enable the provision of the site developments and low carbon technologies, significant upgrades to the electrical power infrastructure are required, this includes additional capacity from the distribution network operator (DNO), and new private site infrastructure.

The current agreed supply capacity for the Hospital is 3.3MVA. BCHUB appointed Consilium to undertake a high level master plan assessment of the electrical load demand considering

future new developments, inclusion of new EVC points, and planned decarbonisation projects at the hospital which has resulted in an increase of demand to 6.6MVA (for the inclusion of the 3 No. new buildings, and some initial electric vehicle charging), and up to 9MVA when considering decarbonisation strategies and further electric vehicle charging.

Strategic locations for new external substations and switch rooms have been identified to enable the existing hospital supply to remain live during the anticipated work, as far as is practicably possible.

Potential Contractors or their sub-contractors must be able to be carry out design and construction works on 33KVA systems and will need to be NERS accredited ICP.

## **II.3) Estimated date of publication of contract notice**

20 November 2024

---

## **Section IV. Procedure**

### **IV.1) Description**

#### **IV.1.8) Information about the Government Procurement Agreement (GPA)**

The procurement is covered by the Government Procurement Agreement: Yes

---

## **Section VI. Complementary information**

### **VI.3) Additional information**
