II.1) Title attributed to the contract by the contracting authority/entity:

Fuels Transformation Programme Supplier Forum

II.2) Type of contract and location of works, place of delivery or of performance

Supplies

Main site or location of works, place of delivery or of performance

At Military sites across the UK and potentially at the Permanent Joint Operating Bases Overseas.

NUTS code

- UK - United Kingdom

II.3) Information on framework agreement

The notice involves the establishment of a framework agreement: No

II.4) Short description of nature and scope of works or nature and quantity or value of supplies or services

The Fuels Enterprise Strategy (FES) has moved from being a Strategy into Programme delivery and has been renamed the Fuels Transformation Programme (FTP). At the same time, FTP transferred internally within the MOD from DE&S into UK Strat Com to enable better alignment with and direction from the programme's Senior Responsible Owner (SRO).

FTP is tasked to:

- Develop the high-level concept to transform the Defence Fuels Enterprise (DFE) to deliver an optimized:
 - o defence fuels estate;
 - o supply chain (both on base and off base);
 - o management organisation,

- with:
 - o identified accountabilities;
 - o improved information management and financial controls,
- and:
 - o lower cost of acquisition, storage, distribution and management,
- while:
 - o investigating ways of increasing and developing sustainability in furtherance of NZ50 objectives.

As we move into the next phase of assessing how projects within FTP can be delivered it is the perfect time for the Authority to share with industry its progress on the programme and the development of assessment phase projects. A supplier forum is planned for 28th July 2021 at which the Authority will share an update and brief on the progress, issues, challenges and risks within FTP. The Authority will also set out a Request for Information (RFI) seeking information on, for example:

- supplier's experience from their implementation of similar programmes;
- associated lessons learnt, risks, issues, opportunities and benefits;
- opportunities to enhance effectiveness and/or efficiency based on their experience in the UK Defence or allied nation's supply chain;
- industry products, services and capabilities that could meet the requirement;
- gather and/or validate market intelligence.

for the two main projects within FTP; Defence Fuel Information Capability and Fuels Service Delivery.

The supplier forum will be held virtually, and the outline agenda (subject to change) is:

- Headline Address;
- UK StratCom Support Transformation & Logistic Transformation organisation, portfolio overview and programme coherence;
- Fuel Transformation Programme brief.

To secure your place at the event please visit
