PRO004614

Description

Ordnance Survey data is a functional component to UU. Our current agreement, awarded via Direct Award has been in place for 2 years since 2023. United Utilities leverages mapping technology extensively to manage and optimize our vast network of water and wastewater assets included but not limited to:

1. Geographical Information system (GIS): used to consolidate asset records into a single database. This helps in tracking and managing over 76000km of sewers and 42000 of clean water pipe.
2. Asset Mapping: Improved the tracking of transferred assets and better maintenance and proactive works

3. Improved data quality: enhanced data and reduced customer service costs with the mapping technology

Using OS functions:

- OS MasterMap Topography
 - OS AddressBase Premium
 - OS MasterMap Highways Road
 - Codepoint Polygons
 - Terrain 5 Tiles
-

Contract 1. PRO004614-Ordnance Survey Licences 2023

Supplier

- [LANDMARK INFORMATION GROUP LIMITED](#)

Contract value

Procedure

Procedure type

Direct award

Special regime

Utilities

Direct award justification

Single supplier - technical reasons

As well as the OS mapping technology, Landmark are providing an integrated automated service wrapper that if removed it would impact Accenture's support costs as there would be much more manual activity involved -This interoperability is the reason why we must direct award.
