Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Supply of Recombinant Proteins to APHA

Reference number

C24452

II.1.2) Main CPV code

- 24956000 - Peptones and protein substances

II.1.3) Type of contract

Supplies

II.1.4) Short description

Supply of Recombinant Proteins to the Animal and Plant Health Agency (APHA).

II.1.6) Information about lots

This contract is divided into lots: No

II.1.7) Total value of the procurement (excluding VAT)

Value excluding VAT: £116,420

II.2) Description

II.2.3) Place of performance

NUTS codes

- UK - United Kingdom

Main site or place of performance

APHA, Weybridge

II.2.4) Description of the procurement

The requirement is for production and supply of nine (9) novel recombinant proteins in a polyhistidine tags ("His-tags") presentation (to include cloning, expression and purification).

II.2.5) Award criteria

Price

II.2.11) Information about options

Options: No

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Award of a contract without prior publication of a call for competition in the cases listed below

- The products involved are manufactured purely for the purpose of research, experiment, study or development

Explanation:

This product is required purely for research purposes. This procurement aims to provide a small quantity of the final products (recombinant proteins, 2mg/ml in a purified state) that can be used to validate previously generated data and allow further development of serological assays.

An analysis of the five requirements of the Frascati guidelines have been completed and all five criteria are met for this requirement:

- Novel: These required products are novel proteins that have not been previously produced or made available commercially.
- Creative: Fragments identified in the discovery phase have been identified for production as full chain recombinant proteins. This is the first time these have been identified for any species.
- Uncertainty of outcome: Due to the novel nature of the requirement, there is a possibility that the Supplier will not be able to produce one / more of these proteins. The production of the proteins will be challenging as there may be unknown factors that could cause the proteins to be unstable.
- Systematic: The project is conducted under quality standard ISO 9001:2015. This standard requires documentation of all work, including obtaining data sheets of the procured proteins.
- Transferrable: Knowledge will be fully transferable in the future and would allow an alternative supplier to re-produce the results.

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: Yes

Section V. Award of contract
