# **Section VI. Complementary information**

## VI.3) Additional information

Following on from the initial success of Police CyberAlarm, the NPCC Cybercrime Programme is looking to procure the next iteration of the Police CyberAlarm system. this will increase the number of data types the system can handle including cloud based data points, improved functionality and usability along with the ability to commercialise aspects of the system to help support its wider rollout and sustainability.

The new system needs to take the existing functionality within Police CyberAlarm including:

The ability to ingest Firewall logs

The ability to enrich and categorise Firewall logs

The ability to analyse events and correlation of events of interest through standard reporting and ad hoc analysis

The ability to vulnerability scan the external IP addresses, external websites and endpoints of a member organisation for known vulnerabilities

As part of the ongoing development of the existing system and research, further data end points have been identified as providing a potentially rich intelligence source for policing. These include:

The ability to ingest and analyse IDS/IPS log

The ability to ingest and analyse email and IM SPAM logs from central collection points rather than individual end points.

The ability to ingest and analyse network AV logs

MINT Commercial Services LLP is conducting this procurement process on behalf of The Mayor and Commonality and Citizens for The City of London (The Contracting Authority).

\*\*Please note that the procurement documents for this tendering opportunity will be available to bidders from 16 March 2021\*\*
