Tenders or requests to participate must be submitted to the above-mentioned address

Electronic communication requires the use of tools and devices that are not generally available. Unrestricted and full direct access to these tools and devices is possible, free of charge, at

<https://www.contracts.mod.uk/web/login.html>

I.4) Type of the contracting authority

Ministry or any other national or federal authority

I.5) Main activity

Defence

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Heavy Lift Challenge

Reference number

701570378

II.1.2) Main CPV code

- 73000000 - Research and development services and related consultancy services

II.1.3) Type of contract

Services

II.1.4) Short description

Heavy Lift Challenge

The Heavy Lift Challenge (HLC) Framework (the Framework) has been created by the Authority in order to accelerate the development of a range of autonomous Heavy Lift Uncrewed Air Systems for use predominantly, but not exclusively, in the maritime domain.

The intention is to address the lack of current options in the market by increasing the number of delivery ready platforms in order to help support and develop the Authority's understanding of the potential capabilities and uses for of such autonomous systems.

The Authority will facilitate accelerated development of a number of Supplier Uncrewed Air Systems (UAS) to meet or exceed the requirements of an Authority defined Minimum Viable Product.

Our intent is to ensure that Defence will have access at the speed of relevance to current and future emerging cutting-edge capabilities for use within the Royal Navy and other domains.

The Authority will facilitate, via the use of this competitive framework, an environment whereby suppliers are able to demonstrate current capabilities, set out product development and commercial exploitation roadmaps and work with both the Authority and potentially with other suppliers to accelerate pace of development and reduce time to market.

The purpose of the HLC Framework is therefore to support and inform the development of Maritime operating concepts and enable assessment, analysis, exploration and evaluation of the use of un-crewed air systems (UAS) for beyond visual line of sight (BVLOS) payload delivery.

The Framework is designed specifically to:

i) provide Sponsor / User confidence in the potential for UAS systems to provide recoverable, adaptable, remotely piloted air systems, capable of accurately delivering heavy payloads at range;

ii) enable the Authority to identify and as appropriate fund the most viable solutions in the market for accelerated further development in order to meet the Authority's minimum requirement (the Minimum Viable Product or "MVP") within the times stated,

iii) provide the Authority with a mechanism for end users to potentially acquire for further evaluation or other use those solutions which demonstrably meet or exceed the MVP.

Risk Assessment Reference: 927478142

Cyber Risk Profile: Not Applicable

28th June 2021 update #1: Please note a recorded presentation on the process of how to bid will be available on DSP on Wednesday 30th June 2021 followed by a virtual Industry Day on Thursday 8th July 2021.

II.1.5) Estimated total value

Value excluding VAT: £20,000,000

II.1.6) Information about lots

This contract is divided into lots: Yes

Tenders may be submitted for one lot only

II.2) Description

II.2.1) Title

20,000,000

Lot No

1 & 2

II.2.2) Additional CPV code(s)

- 73000000 - Research and development services and related consultancy services

II.2.3) Place of performance

NUTS codes

- UK - United Kingdom

II.2.4) Description of the procurement

Heavy Lift Challenge

The Heavy Lift Challenge (HLC) Framework (the Framework) has been created by the Authority in order to accelerate the development of a range of autonomous Heavy Lift Uncrewed Air Systems for use predominantly, but not exclusively, in the maritime domain.

The intention is to address the lack of current options in the market by increasing the number of delivery ready platforms in order to help support and develop the Authority's understanding of the potential capabilities and uses for of such autonomous systems.

The Authority will facilitate accelerated development of a number of Supplier Uncrewed Air Systems (UAS) to meet or exceed the requirements of an Authority defined Minimum Viable Product.

Our intent is to ensure that Defence will have access at the speed of relevance to current and future emerging cutting-edge capabilities for use within the Royal Navy and other domains.

The Authority will facilitate, via the use of this competitive framework, an environment whereby suppliers are able to demonstrate current capabilities, set out product development and commercial exploitation roadmaps and work with both the Authority and potentially with other suppliers to accelerate pace of development and reduce time to market.

The purpose of the HLC Framework is therefore to support and inform the development of Maritime operating concepts and enable assessment, analysis, exploration and evaluation of the use of un-crewed air systems (UAS) for beyond visual line of sight (BVLOS) payload delivery.

The Framework is designed specifically to:

- i) provide Sponsor / User confidence in the potential for UAS systems to provide recoverable, adaptable, remotely piloted air systems, capable of accurately delivering heavy payloads at range;
- ii) enable the Authority to identify and as appropriate fund the most viable solutions in the market for accelerated further development in order to meet the Authority's minimum requirement (the Minimum Viable Product or "MVP") within the times stated,

iii) provide the Authority with a mechanism for end users to potentially acquire for further evaluation or other use those solutions which demonstrably meet or exceed the MVP.

II.2.5) Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.7) Duration of the contract, framework agreement or dynamic purchasing system

End date

22 August 2025

This contract is subject to renewal

No

II.2.10) Information about variants

Variants will be accepted: No

II.2.11) Information about options

Options: No

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

Section III. Legal, economic, financial and technical information

III.1) Conditions for participation

III.1.2) Economic and financial standing

Selection criteria as stated in the procurement documents

III.1.3) Technical and professional ability

Selection criteria as stated in the procurement documents

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Open procedure

IV.1.3) Information about a framework agreement or a dynamic purchasing system

The procurement involves the establishment of a framework agreement

Framework agreement with several operators

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: No

IV.2) Administrative information

IV.2.2) Time limit for receipt of tenders or requests to participate

Date

26 July 2021

Local time

12:00pm

IV.2.4) Languages in which tenders or requests to participate may be submitted

English

IV.2.6) Minimum time frame during which the tenderer must maintain the tender

Duration in months: 3 (from the date stated for receipt of tender)

IV.2.7) Conditions for opening of tenders

Date

26 July 2021

Local time

12:00pm

Section VI. Complementary information

VI.1) Information about recurrence

This is a recurrent procurement: No

VI.2) Information about electronic workflows

Electronic payment will be used

VI.4) Procedures for review

VI.4.1) Review body

Ministry of Defence

Bristol

Country

United Kingdom
