Scope

Description

We are undergoing a pre-market engagement exercise with suppliers that can fulfil a specific specialised requirement for Identity Access Management to control access to our resources like apps, files, and data. It verifies identities, grants permissions, and protects data from cyberattacks.

We are exploring options with the market to ascertain the best suite of products and phases. It is planned to complete the purchase through an existing framework, DPS or dynamic market. In the interest of transparency we have published this notice to obtain feedback to help us finalise our next stage.

Interested parties are requested to register to obtain further details about the project and to provide some market information.

This procurement may be split into small lots depending on market feedback to encourage SME participation.
