Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Award of a contract without prior publication of a call for competition in the cases listed below

- The procurement falls outside the scope of application of the regulations

Explanation:

It is the Contracting Authority's intention to directly award a contract based on the following justification:

Its strategic approach is for the implementation of care pathways – across primary, community and hospital services – which can provide rapid and intensive support to how the delivery of care is integrated and can better secure the various care needs of patients.

Its market assessment has only identified a single provider - who has the range of readily available care pathways that can be localised - that can deliver the rapid improvement that the Contracting Authority requires commensurate to securing the needs of patients. This consists of over 1,000 pathways that could be immediately available to local clinicians – across primary, community and hospital services – to review, edit and localise to direct how the various care needs of patients can be better secured. The adopting of this service and by using this platform means joining an international community of collaborators who can easily and rapidly share established and tested content to support high quality care, which can be localised. It also supports the learning from shared ways of clinically collaborating and feedback from the community from using the guidance and information into our health system.
