Curriculum Management System

Bath Spa University

UK2: Preliminary market engagement notice - Procurement Act 2023 - [view information about notice types](#)

Notice identifier: 2025/S 000-015386

Procurement identifier (OCID): ocds-h6vhtk-050393 ([view related notices](#))

Published 15 April 2025, 7:05pm

Scope

Description

As Bath Spa University (BSU) scales, grows and diversifies as set out within our Strategy 2030, the information management systems adopted by BSU must be efficient and reliable, avoiding manual or duplication of work, thereby reducing manual errors. The Curriculum Management System (CMS) project will enable BSU to increase levels of data integrity, quality, efficiency and compliance, whilst reducing inefficiencies, manual effort, risks and student complaints.

BSU propose to procure and implement a CMS software-based solution, to manage tasks and processes relating to our portfolio of academic programmes of study. It will support the design, development, modification, management, quality assurance, governance and delivery of taught programmes and modules. The system will be structured to provide guidance to staff, direction of processes, helping to increase efficiency and improve institutional data quality. The curriculum management system will support the lifecycle of a programme, delivering a transparent workflow, recording and managing accurate data as a central repository of all programme related information. In addition to the development process, the CMS will support documentation, maintenance, timetabling, resourcing, and reporting associated with programme management and delivery.

Currently BSU are undertaking pre-market engagement to ensure we understand the

market before proceeding with a formal procurement process.
