The potential solution must be able to support DWP with a payment infrastructure to address a catastrophic event which prevents DWP from preparing and issuing payments files. The Department could be vulnerable to external risk such as cyber security threats which could result in the estate environment not being able to access the data and potentially unable to process and create the payment files. The potential solution which will be operating outside of DWP estate is crucial for the Department's risk mitigation strategy.

In general, DWP makes on average 2.5m customer payments per day, to a value of over £3bn per week. We are obliged to ensure that payments are credited to customer accounts on the due date, early or late payments cannot be tolerated. The secure, timely payment of benefits to our vulnerable customers is critical to DWP's business.

All potential solutions must be:

- Able to meet Industry Standards for Security Best practice, ISO 27001, Cyber Essentials Plus, FSA Security and Web Content Accessibility Guidelines 2.1
- Able to provide Management Information for reconciliation and audit purposes;
- Compliant with UK payment scheme(s) (e.g. BACS) rules and payment formats;
