Description

Procurement of a suitable number (In this order, a total of 32) of large soft-sided disposal packages to support demolition of three RAD buildings. These bags, the specifications of which are attached in the supplementary information, are 2.44m wide x 2.44m tall x 5.79m long, and are intended to fit into a Roll-on, Roll-Off container in a one to one ratio. They are intended to replace smaller packages, such as 1m³ dumpy bags which would otherwise have to be used. The single larger package offers advantages in ease of demolition; direct loading of waste packages by demolition excavator; reduced need to carry out waste size reduction and segregation, accelerating demolition timelines. The types of waste that the bags will be used to dispose of are various, but are all sharp, bulky, non-RAM for transport radioactive wastes, some with a limited range of hazardous properties.
