Scope

Description

Newcastle City Council has procured a comprehensive hosted energy monitoring and targeting software solution to support our energy management needs. The system provides a dynamic and intuitive platform that fully complies with all required data recording, reporting, and management standards.

The solution enables the Council to efficiently collect, analyse, and manage energy consumption data across our estate, improving both the quality and effectiveness of the information we hold. This will support better decision-making, enhanced performance monitoring, and improved energy efficiency.

The contract is in place for a five-year period, during which the solution will support ongoing monitoring, reporting, and targeting of energy usage in line with the Council's strategic objectives.
