Price

II.2.11) Information about options

Options: No

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Negotiated procedure without publication of a contract notice

- The products involved are manufactured purely for the purpose of research, experiment, study or development
- The works, supplies or services can be provided only by a particular economic operator for the following reason:
 - protection of exclusive rights, including intellectual property rights

Explanation:

The Authority proposes to enter into a contract with the above named supplier on a single source basis in accordance with regulation 32(2)(b) and 32(5)(b) of the Public Contracts Regulations 2015. In order to meet the Authority's requirement the equipment to be purchased has to be the same model, dimension and have the same operating system type as the machine already sited at the required location to permit the interoperability between the equipment to ensure the ability to quickly locate common spares and compatibility with existing Authority storage equipment. The current system contains an in-built fire-suppression system which is an Authority requirement and critical to operational safety. Procuring different equipment would oblige the Authority to acquire supplies having different technical characteristics which would result in incompatibility or disproportionate technical difficulties where the consequence of having a different model would result in an unacceptable reduction in operational effectiveness and safety and increases the resource and training burden.

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: No

Section V. Award of contract/concession

Contract No

702379450

Title
