Scope

Reference

T322

Description

It is proposed to establish a Multi-Party Framework which will consist of two lots,

- Lot 1 will consist of larger scale substations with a range between 110 - 400kV and an estimated cost range between £20 to £100m.
- Lot 2 will consist of medium scale substations with a range between 33 - 275kV and an estimated cost range between £1 - £20m
- The scope of works to be procured will include predominantly substation works including turnkey electrical, mechanical, civils and enabling works, with the inclusion of local overhead lines and cables within the curtilage of the site.

- NIEN wish to retain the flexibility for each lot to utilise both Design and Build (D&B) and Engineering Procurement and Construction (EPC) models.
- The default approach will be that equipment supply (transformers and switchgear etc.) will be in the scope of projects. Free issue of equipment will be limited to those projects for which NIEN have equipment ordered.

Commercial tool

Establishes a framework

Total value (estimated)

- £362,000,000 excluding VAT
- £434,400,000 including VAT

Above the relevant threshold

Contract dates (estimated)

- 1 April 2026 to 1 April 2031
- Possible extension to 1 April 2034
- 8 years, 1 day

Description of possible extension:

One three year extension

Main procurement category

Works

CPV classifications

- 45232220 - Substation construction work

Contract locations

Lot constraints

Description of how multiple lots may be awarded:

Specified in the Pre-Qualification Instructions available for downloading

Lot 1 (was Lot 1). Larger scale transmission substations

Description

Larger scale transmission substations : c. £25m to 100m (400/275/110 kV)

Lot value (estimated)

- £362,000,000 excluding VAT
- £434,400,000 including VAT

Framework lot values may be shared with other lots

Same for all lots

CPV classifications, contract locations and contract dates are shown in the Scope section, because they are the same for all lots.

Lot 2 (was Lot 2). Medium Scale Substations

Description

Medium scale substation works c. £1m - £25m (275/110/33 kV)

Lot value (estimated)

- £362,000,000 excluding VAT
- £434,400,000 including VAT

Framework lot values may be shared with other lots

Same for all lots

CPV classifications, contract locations and contract dates are shown in the Scope section, because they are the same for all lots.

Competitive flexible procedure description

It is intended to procure the Framework Agreement via a multi-stage process. First stage will involve the Conditions of Participation (Pre-Qualification). Suppliers will be required to complete the Pre-Qualification Questionnaire and submit with supporting documentation requested in the Questionnaire. Following an evaluation of the submissions NIE Networks will invite up to six Suppliers for Lot 1 and to six Suppliers for Lot 2. These shortlisted Suppliers will be invited to tender (second stage) and following receipt of tenders NIE Networks at its sole discretion reserves the right to commence negotiations or invite Best and Final Offers (third stage) and the final stage will be establish the framework agreement and award the initial drawdown contracts Ballylumford (lot 1) and Tureagh (lot 2). Full details are available in the Pre-Qualification Instructions.
