Description

The Authority has been awarded £1.625m LEVI funding from the Office of Zero Emission Vehicles (OZEV) through the Local Electric Vehicle Infrastructure (LEVI) fund.

Based on that funding and the resulting tender the Authority is now looking to award single concession contract for a supplier to install and operate an affordable and easy to use, reliable and widely accessible and recognisable Electric Vehicle (EV) charge point network across the Isle of Wight (the 'Contract')

The form of contract has been developed in alignment with the LEVI Heads of Terms.

The appointed Supplier will look to maximise use of the LEVI funding and deliver an

ambitious project with a full solution offering end to end services.

The appointed supplier will invest its own resources, to be used in conjunction with the LEVI funding, to significantly increase the number of public chargepoints available on the public highway network across the island.

The project will involve the deployment of local, primarily low powered on street charging infrastructure which must focus on locations that serve residential communities and those residents that do not have access to off road car parking.

The Supplier will deliver all aspects of the goods, services and works needed for the Project, which will include purchasing relevant Electric Vehicle Charging Infrastructure (EVCI), connecting it to the grid and maintaining, upgrading and managing the operation of the chargepoint network across a 15-year term.

Contract 1. Local Electric Vehicle Infrastructure (LEVI) fund - Electric Vehicle Charge Point Network - Concession Contract on The Isle of Wight

Supplier

- CHAR.GY LIMITED

Contract value

- £34,000,000 excluding VAT
- £40,800,000 including VAT
