Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Network Rail Telecoms Professional Services

Reference number

<https://networkrail.bravosolution.co.uk/esop/guest/go/opportunity/detail?opportunityId=50634>

II.1.2) Main CPV code

- 79620000 - Supply services of personnel including temporary staff

II.1.3) Type of contract

Services

II.1.4) Short description

Framework agreement to provide the business professional service contracts to provide the resources required to support delivery commitments for 2 years plus an optional 2 years (values of this Notice include both optional years). In addition to providing skilled resources, the successful suppliers will also be expected to provide a management service covering the search, through to onboarding of the resources they provide, along with management information to both demonstrate transparency of engagements and service performance and support commercial management of the agreement.

II.1.6) Information about lots

This contract is divided into lots: Yes

II.1.7) Total value of the procurement (excluding VAT)

Value excluding VAT: £80,000,000

II.2) Description

II.2.1) Title

NRT Management & Strategy Professional Services

Lot No

1

II.2.2) Additional CPV code(s)

- 79620000 - Supply services of personnel including temporary staff

II.2.3) Place of performance

NUTS codes

- UK - United Kingdom

II.2.4) Description of the procurement

The Network Rail Telecom (NRT) team is responsible for operating all of NRT's telecoms assets and networks. This responsibility includes handling asset life cycles as well as the development, delivery and support of outstanding telecommunication networks and services. In simple terms, NRT transports data between A and B enabling Network Rail to run operationally both on the railway (signalling, customer information systems, CCTV cameras etc.) and as a business (desk phones, mobile devices, data connections etc.). NRT is also playing a key role in the realisation of our digital railway aspiration which requires huge amounts of data to be handled securely for it to work.

NRT deliver projects and programmes that support both Network Rail and the wider rail industry to benefit Great Britain's economy through more effective train operation, customer experience and industry flexibility, enabled by accelerating the application of digital technologies to the railway. This is enabled by unlocking capacity through a digitally enabled command, control and signalling system, reducing delays through improved asset monitoring and control strategies and better operational support tools and systems. This delivers a more flexible service based on demand on a safe and reliable network with fewer on-track assets to maintain. It will be underpinned by an open data approach to rail information across the industry which means passengers are presented with an integrated picture of cost, availability, payment services and real-time journey information; all of which will be enabled by a digitally enabled operating platform.

A number of initiatives are already 'in flight' with the aim of delivering 'business as usual' deployment of digital technologies from CP7. In order to support the outputs required by NRT a supplier will be appointed support the delivery of our ongoing programme.

Specific packages of work will be outlined in greater detail as tranches of work are let, however, activities within the Account Management area likely to include but are not limited to the following activities:

Account management

Business analysis and planning

Business change management

Commercial management

Customer relationship management

Portfolio management

Programme management

Project management

II.2.5) Award criteria

Price

II.2.11) Information about options

Options: No

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

II.2) Description

II.2.1) Title

NRT Technical and Engineering Professional Services

Lot No

II.2.2) Additional CPV code(s)

- 79620000 - Supply services of personnel including temporary staff

II.2.3) Place of performance

NUTS codes

- UK - United Kingdom

II.2.4) Description of the procurement

The Network Rail Telecom (NRT) team is responsible for operating all of NRT's telecoms assets and networks. This responsibility includes handling asset life cycles as well as the development, delivery and support of outstanding telecommunication networks and services. In simple terms, NRT transports data between A and B enabling Network Rail to run operationally both on the railway (signalling, customer information systems, CCTV cameras etc.) and as a business (desk phones, mobile devices, data connections etc.). NRT is also playing a key role in the realisation of our digital railway aspiration which requires huge amounts of data to be handled securely for it to work.

NRT deliver projects and programmes that support both Network Rail and the wider rail industry to benefit Great Britain's economy through more effective train operation, customer experience and industry flexibility, enabled by accelerating the application of digital technologies to the railway. This is enabled by unlocking capacity through a digitally enabled command, control and signalling system, reducing delays through improved asset monitoring and control strategies and better operational support tools and systems.
