Contract

CEFAS25-28 Data study for detection of oil spills using satellite data

Centre for Environment, Fisheries and Aquaculture Science

UK7: Contract details notice - Procurement Act 2023 - view information about notice types

Notice identifier: 2025/S 000-016503

Procurement identifier (OCID): ocds-h6vhtk-05064c

Published 23 April 2025, 1:26pm

Scope

Reference

CEFAS25-28

Description

The goal of the data study is to automatically detect actively leaking shipwrecks in a way that can be scaled up on a cloud platform to monitor hundreds of shipwreck sites simultaneously. The detections will need to be screened by an observer so detection accuracy must be balanced with the number of false positives produced, as a result of wind effects, natural spills or image speckle noise.
