#### **II.2.5) Award criteria**

Price

#### **II.2.11) Information about options**

Options: No

---

## Section IV. Procedure

### IV.1) Description

#### IV.1.1) Type of procedure

Award of a contract without prior publication of a call for competition in the cases listed below

- The services can be provided only by a particular economic operator for the following reason:
  - absence of competition for technical reasons

Explanation:

No reasonable alternative exists for this procurement, this product is essential for treatment of burns patients Novosorb BTM is indicated for full or deep partial thickness burns and wounds, surgical and reconstructive wounds and traumatic wounds. It has the unique property of completely biodegrading within 12-18 month period. It is composed of three layers including biodegrading foam, bonding layer, and sealing membrane which acts as an interface for deep burns down to the muscle. BTM is applied to a wound once the unhealthy or dead tissue has been surgically removed. BTM temporarily closes the wound, which limits moisture loss. With the wound closed, the body can begin the repair process and dermal tissue can grow through the BTM foam matrix as the body heals. The absence of competition is not the result of an artificial narrowing down of the parameters of this procurement.

#### IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: Yes

### IV.2) Administrative information

#### IV.2.1) Previous publication concerning this procedure
