Planning

PROC/7159/24 - The London Fire Brigade OneRisk

London Fire Brigade

F01: Prior information notice

Prior information only

Notice identifier: 2024/S 000-017179

Procurement identifier (OCID): ocids-h6vhtk-046d08

Published 3 June 2024, 3:53pm

Section I: Contracting authority

I.1) Name and addresses

London Fire Brigade

169 Union Street

London

SE1 0LL

Contact

Allison Funmi

Email

Allison.funmi@london-fire.gov.uk

Country

United Kingdom

NUTS code

UKI - London

Internet address(es)

Main address

www.london-fire.gov.uk

I.3) Communication

Additional information can be obtained from the above-mentioned address

I.4) Type of the contracting authority

Regional or local authority

I.5) Main activity

Public order and safety

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

PROC/7159/24 - The London Fire Brigade OneRisk

Reference number

PROC/7159/24 -

II.1.2) Main CPV code

- 48000000 - Software package and information systems

II.1.3) Type of contract

Supplies

II.1.4) Short description

LFB OneRisk is an ambitious project which seeks to eventually deliver: A single risk

database – A single consolidated fire risk information database which combines a number of existing legacy risk information systems. A data aggregator – The aggregation of data from wider external third-party sources (e.g. NHS or social services data) to complement LFB-collected data. Local risk analytics – The ability to perform enhanced data analysis to further develop LFB's understanding of local risk profiles. Digital risk applications to "support frontline staff to easily identify, capture and update risk data"¹.

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.2) Additional CPV code(s)

- 48000000 - Software package and information systems
- 72320000 - Database services
- 72266000 - Software consultancy services
- 48612000 - Database-management system
- 48611000 - Database software package
- 72212610 - Database software development services
- 48610000 - Database systems
- 72321000 - Added-value database services
- 72212600 - Database and operating software development services
- 72261000 - Software support services
- 48600000 - Database and operating software package
- 72262000 - Software development services
- 72267000 - Software maintenance and repair services
- 72263000 - Software implementation services

II.2.3) Place of performance

NUTS codes

- UKI - London

II.2.4) Description of the procurement

LFB has made a strategic decision to pursue a Commercial Off The Shelf (COTS) and cloud-hosted solution for LFB OneRisk; LFB are open to use of the supplier's cloud environment, or LFB's Microsoft Azure tenancy. This is in alignment with LFB's digital strategy and LFB's ambition to realise economies of scale via interoperability with neighbouring FRSs and the benefits that brings (e.g. seamless interworking, sharing of costs). For the avoidance of doubt, LFB is not seeking the services of a supplier to develop a new bespoke fire risk information solution. The brigade is seeking a Minimum Viable Product (MVP) approach to delivery of its key requirements for LFB OneRisk. The delivery of the LFB OneRisk including its rollout across the business is expected to be a highly complex activity due to the scale of LFB's operations (e.g. number of users, quantity of data to be migrated), the age of existing legacy systems, and existing business processes being deeply embedded over a significant period of time. The objective of the MVP will be to maintain the core of present / existing 'As-Is' functionality. However, the brigade recognises (and accepts) there is likely to be a degree of functionality and process mismatch through the adoption of a COTS solution; LFB is committed to making reasonable business process adaptations as part of LFB OneRisk. The planned adoption phasing across the business is not currently confirmed, but may commence with LFB Prevention and smaller teams within LFB Protection, as part of a series of targeted pilots. The remainder of LFB Protection Teams and the Operational Teams would then be subsequently onboarded to the LFB OneRisk solution. LFB requires a full migration of existing data including in-flight records. Due to the volume of existing records and the significant number of Greater London premises, it is infeasible for LFB to adopt a 'greenfield' approach to its data records. Additional Information: The London Fire Commissioner will be issuing a Request for Information to interested suppliers as the Brigade finalises their requirements for the future procurement. In order to get further details on this you will be required to register on the procurement portal <https://sell2.in-tend.co.uk/blpd/register> Please ensure that you as a supplier are registered with In-Tend using the above link, if you are not then you will need to register via Sell2, ensuring that you select London Fire in the portals page. I have attached an email that explains this in more detail. Please note that the registration process is a 'two-step' process. Where a supplier first registers on the In-Tend portal and then once registered, selects London Fire in the portals page, as the second stage. If this second stage isn't completed then you will not be able to tender with the LFC. If you have any issues, then you should contact e-procurement@bluelight.police.uk. All responses to the RFI should be submitted via the Portal as indicated.

II.3) Estimated date of publication of contract notice

31 May 2024

Section IV. Procedure

IV.1) Description

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: Yes
